

*Warren Brander – President, Derma Wise Skin Care Ltd.*

With a passion for health and wellness and a particular interest in Plant Medicine, Warren Brander has been involved in the development and sale of natural health products and over-the-counter (OTC) medicines for more than 10 years. A graduate of Victoria's International College of Traditional Chinese Medicine in 1993, Brander completed a number of professional specialized courses in Dermatology, Internal Medicine and Cosmetic Science.

Brander's reputation as a results oriented health practitioner led him to be contracted to develop natural health products for marketing companies across North America. With an inside-out treatment method, Brander quickly noticed an absence of safe and effective personal care ointments available on the market, additionally pointing out that most OTC pharmacy ointments have not changed in their composition for more than 50 years, a startling discovery considering what physicians and researchers now know about the skin and its requirements for optimal healing, recovery, and rejuvenation.

Brander then developed Théra Wise, a science based holistic line of personal care ointments designed to offer a body-friendly, biodegradable alternative to mainstay OTC ointments. Théra Wise accesses the knowledge of Oriental Medicine, Cosmetic Science, and Plant Medicine treatment principles in order to offer a unique and balanced approach to healing by treating the supporting structures of the skin, reducing inflammation and allowing the skin to breathe and properly repair.

Currently Derma Wise Skin Care Ltd. distributes its Théra Wise line throughout North America, Singapore and New Zealand. Théra Wise products can be found at major pharmacy retailers in Canada and the US.

*Yasuko Brander – Managing Director, Derma Wise Skin Care Ltd.*

A registered reflexologist, Yasuko Brander worked as a manager in the natural health product manufacturing and wholesale industry for 10 years before co-founding Derma Wise Skin Care Ltd. with husband Warren in 2003. Currently, Brander is Managing Director of Derma Wise Skin Care Ltd., and is committed to offering high-quality natural products that empower customers to overcome their health challenges.

A life-long sufferer of eczema and atopic dermatitis, Brander was unable to effectively manage her condition until adopting a series of natural therapies. Through the use of Théra Wise's SHO – Bioactive Skin Healing Ointment, as well as a healthy diet and lifestyle modifications, Brander has now been able to control her eczema for more than 3 years.
